

DuoCron ERP for Personal Care & Cosmetics

From Formulation to Fulfillment – The Smarter ERP for
Beauty & Personal Care Brands!

Introduction

In the dynamic world of personal care and cosmetics, where innovation meets stringent compliance, managing end-to-end operations is crucial. DuoCron ERP offers a comprehensive, cloud-based solution tailored for the beauty industry.

From R&D and formulation to packaging, labeling, and global compliance —DuoCron ERP helps cosmetics and personal care manufacturers scale faster, stay compliant, and delight customers with consistent, high-quality products.

Whether you're developing natural skincare lines, launching new fragrances, or managing bulk production for global retailers, DuoCron ERP brings your entire operation under control while empowering you to scale and innovate.

What Makes DuoCron ERP Sets Apart?

- ✓ ERP is free, pay only for services.
- ✓ Fully optimized, yet easily customizable.
- ✓ Built-in Custom Industry Specific Features
- ✓ Seamlessly integrates with AI and other tools.

**10+ Years of
Experience**

**24*7 Customer
Support**

**Worldwide
Presence**

We Understand Your Challenges

■ Regulatory Compliance & Labeling

Navigating global regulations like FDA, INCI, and EU standards requires meticulous labeling and documentation. Ensuring compliance across regions is complex and time-consuming.

■ Multi-SKU & Packaging Variants

Managing the same product in different packaging formats—tubes, jars, pumps—each with unique barcodes and specifications, adds layers of complexity to inventory management.

■ Shelf Life & Expiry Management

Preventing expired inventory from reaching customers necessitates automated batch tracking and stock blocking mechanisms.

■ Complex Formulation Management

Developing products with varying pH levels, viscosities, and ingredient combinations demands precise formulation tracking and version control.

■ Quality Control & Sensory Testing

Maintaining consistent product quality in terms of color, fragrance, and texture requires rigorous batch-wise testing and documentation.

■ Sample Tracking & New Product Development

Handling internal samples, customer trials, and development cycles with version control and testing logs is essential for efficient product innovation.

We Understand Your Challenges

■ Demand Forecasting & Seasonal Spikes

Anticipating demand fluctuations, especially during promotional launches or seasonal peaks, is critical for raw material planning and batch scheduling.

■ Fragmented Operations Across Channels

Lack of unified visibility across direct-to-consumer, retail, wholesale, and export logistics leads to inefficiencies and operational silos.

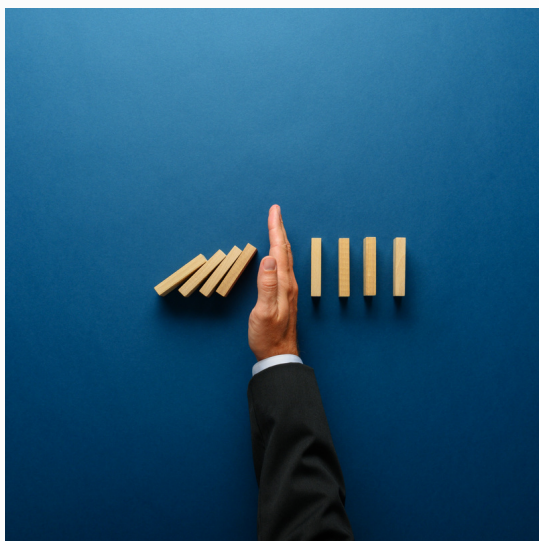

Key Features

Advanced Formulation & Version Control

Manage complex formulations with multi-level BOMs, version tracking, and ingredient scalability to ensure product consistency and compliance.

Regulatory Documentation Management

Automate the creation and distribution of MSDS/SDS, INCI labels, and other compliance documents to meet global regulatory standards.

Multi-Channel Inventory Management

Gain real-time visibility and control over inventory across multiple sales channels, warehouses, and distribution centers.

Quality Control Automation

Implement automated QC checks at every production stage, capturing sensory attributes and ensuring batch consistency.

Key Features

Shelf Life & FEFO Management

Track product shelf life and implement First-Expired-First-Out protocols to minimize waste and ensure product freshness.

Sample & NPD Workflow Management

Streamline new product development with integrated workflows for sample tracking, testing, approvals, and version control.

Demand Planning & Forecasting Tools

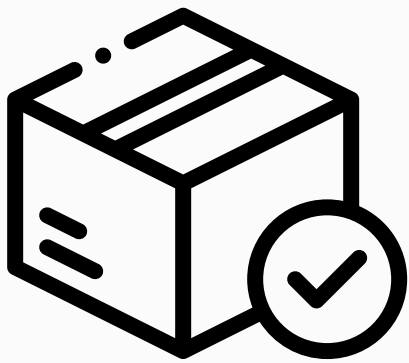

Utilize AI-driven forecasting tools to anticipate demand trends, optimize inventory levels, and plan production schedules effectively.

Integrated Sales & Distribution Modules

Coordinate sales orders, manage pricing strategies, and oversee distribution logistics within a unified platform.

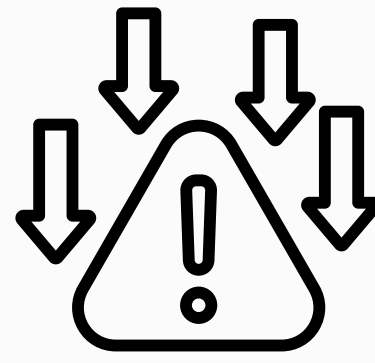

Real Benefits, Real Success
